LETTER FROM OUR CEO

As I reflect on 2025, I am grateful for the strength and resilience demonstrated across Lone Star Circle of Care (LSCC) during a year of significant change.

As the healthcare environment evolved, it brought increased financial pressures, shifting reimbursement models, and operational challenges that required thoughtful decision-making. Among the most difficult steps we faced were the closure of a few clinics and a reduction in parts of our workforce. These decisions were made with great care and only after exploring every alternative, and I remain deeply appreciative of the compassion and professionalism shown by our teams throughout these transitions. Through it all, we remained firmly anchored to our mission of exceptional and accessible patient-centered healthcare for our Texas neighbors.

Despite the challenges, 2025 was a year of meaningful progress. We advanced important work to strengthen our clinical services, including the launch of a new specialty service line, endocrinology, which expands access for patients. We continued refining workflows and operational processes, using staff and patient feedback to guide improvements that support both efficiency and experience. We also made progress in upgrading facilities, technology systems, and patient engagement tools, investments that will have long-lasting impact on the delivery of care.

Our teams remained committed to community outreach, from health education efforts to wellness initiatives that address drivers of health. These initiatives reflect our belief that health extends beyond the exam room and requires a connected, community-centered approach. We also expanded opportunities for learning, training, and professional development to support a strong healthcare workforce for the future.

I am proud that LSCC again earned reaccreditation from The Joint Commission, reaffirming our commitment to excellence and patient safety. We also took important steps to strengthen the patient voice through our transition to a new survey platform, Qualtrics, positioning us to better understand patient needs and further elevate their experience.

As I look to the future, I do so with a renewed sense of purpose. The challenges facing healthcare are real, but so is our determination to meet them with innovation, collaboration, and an unwavering commitment to the people we serve. The progress we made in 2025 reflects not only operational achievements, but our belief that access to high-quality healthcare strengthens communities and changes lives.

Thank you for your continued support of our mission. Together, we are building a healthier, more connected future for the patients and families across Central Texas who count on us.

 **Jon Calvin**
Chief Executive Officer

Adapting with Purpose

Our Mission

Lone Star Circle of Care provides exceptional and accessible patient centered healthcare for our Texas neighbors.

Our Vision

We will eliminate health inequities to facilitate wellness and optimal living for all, helping strengthen our communities.

Our Values

Compassion, Integrity, Respect, Service, Innovation, Excellence

2023-2025

Top Strategic Priority Areas

People

We ensure a culture that values, respects, and treats employees equitably. We have a stable workforce designed to provide high-quality care.

Patient Care

We contribute to healthier communities.

Technology

We leverage technology innovations to advance care. We enhance patient, provider, and staff digital experience.

Sustainability

We maximize opportunities to build financial stability.

Advancing Healthy Communities

Our Services

Behavioral Health

LSCC offers psychiatry and psychotherapy for patients preschool age and up. Behavioral health services are integrated with primary medical care to provide seamless and holistic treatment.

Convenient Care

LSCC offers convenient care with walk-in appointments available at certain locations.

Dentistry

LSCC offers general dentistry for all ages.

Endocrinology

LSCC offers specialty care focused on diagnosing, treating, and managing hormone-related endocrine conditions such as diabetes, thyroid disease, and other metabolic disorders.

Family Medicine

LSCC offers primary medical care for all ages, including prevention, diagnosis, and treatment of acute and chronic conditions.

Mobile Mammography

LSCC’s Big Pink Bus offers low-cost, high-quality screening mammograms across Central Texas.

Obstetrics & Gynecology

LSCC offers obstetrics and gynecology, including prenatal care, labor and delivery, family planning, and gynecological surgery.

Pediatrics

LSCC offers preventative, acute, and chronic medical care for children and teens.

Pharmacy

LSCC offers substantially discounted prescription medications for patients of LSCC’s providers at LSCC’s pharmacies and participating retail pharmacies. LSCC expanded retail pharmacy access in 2025.

School-Linked

LSCC offers access to primary medical care and behavioral health services for Georgetown Independent School District (GISD) employees, students, and their families.

Senior Care

LSCC offers preventative and acute medical care for patients age 55 and older, including diagnosis and treatment of chronic and complex conditions.

Virtual Visits

LSCC offers virtual visits day and night, allowing patients convenient access to video visits with LSCC clinicians.

Vision

LSCC offers general optometry, including glasses, for ages five and up.

Lone Star Circle of Care is dedicated to serving individuals and families by providing high-quality, affordable healthcare to those who need it most.

As consumers of LSCC’s services, members of LSCC’s Board of Directors ensure board decisions and LSCC priorities remain patient-centered. LSCC’s Board of Directors brings diverse expertise in the areas of finance, legal affairs, construction, local government, and healthcare.

Moving Healthcare Forward

COLLINFIELD

On April 7, LSCC expanded behavioral health services at its Collinfield clinic location in North Austin, significantly increasing access to therapy and psychiatry for older teens and adults.

The clinic expanded into an adjacent suite, adding 10 offices and a group room that strengthens the clinic's capacity to support individuals and families across a variety of mental health needs. In addition to the expansion, the clinic received an exterior refresh with a new marquee that highlights the clinic's services, LSCC's phone number, and website, improving visibility for patients and the surrounding community.

ENDOCRINOLOGY

In 2025, LSCC launched its first-ever specialty care service line: endocrinology. Led by **Avinash Ravipati, M.D.**, a board-certified physician in Internal Medicine and Endocrinology, this new service provides care to patients 18 and older at LSCC at Texas A&M Health Science Center – Specialty Care in Round Rock. Dr. Ravipati brings extensive expertise in diagnosing, treating, and managing complex hormone-related conditions and offers highly specialized care for patients with endocrine disorders.

LSCC's endocrinology services include advanced diagnostics, medication management, and personalized treatment plans for a wide range of conditions, such as diabetes, thyroid and metabolic disorders, and bone health concerns.

Introducing this specialty fills a critical care gap in Central Texas, giving patients access to comprehensive treatment for complex chronic conditions. This milestone reflects LSCC's commitment to expanding beyond primary care and improving access to high-quality specialty services.

MOBILE FARMACY

LSCC continued to foster meaningful relationships with community partners to better support the health and well-being of LSCC patients. One highlight of this collaborative work was the launch of a limited-time Mobile FARMacy distribution site at Ben White Health Clinic and Texas A&M Health Science Center, created in partnership with Blue Cross and Blue Shield of Texas (BCBSTX) and the Central Texas Food Bank.

The Mobile FARMacy is a mobile grocery market that drives fresh, nutritious food directly to communities. BCBSTX selected LSCC as a partner site for its **Food Is Medicine** pilot, a program designed to improve health outcomes for Medicare and Medicaid members.

By offering healthy grocery options where LSCC patients already receive care, this partnership helps close care gaps for individuals and families to access healthy food options. This partnership demonstrates the power of cross-collaboration between healthcare, insurance, and hunger-relief organizations who work together to improve health outcomes and expand food access for Central Texans.

Advancing Women’s Health

LSCC’s partnership with the St. David’s HealthCare OB/GYN Residency Program entered its second year at Lone Star Circle of Care OB/GYN at MoPac North.

Established as a new training site in 2024, the rotation evolved into a robust and collaborative learning environment. The program provides residents with meaningful exposure to outpatient obstetrics and gynecology, while also contributing to LSCC’s mission of delivering exceptional and accessible patient-centered healthcare.

Dr. Lori Silver-Morales, Director of OB/GYN Graduate Medical Education, led the program with support from supervising physicians Dr. Bernard Lynch and Dr. Shayla Matthews-Jackson. Together, they cultivated a strong educational experience rooted in clinical excellence and service to the community.

Residents benefited from hands-on clinical experience and a supportive, team-based setting. Reflecting on the rotation’s strengths, Dr. Silver-Morales shared, “The Lone Star rotation has been a positive experience for the residents, office staff, and providers.”

Her perspective underscores the program’s role in fostering an environment where residents can thrive while contributing meaningfully to patient care.

Supervising physicians Dr. Lynch and Dr. Matthews-Jackson remarked on the residents’ preparedness and professionalism. “They are up to date with current clinical practices, emphasizing the strong academic foundation residents bring to the clinic,” said Dr. Lynch.

Dr. Matthews-Jackson echoed this sentiment, noting, “They are consistently open to learning from us,” a reflection of the commitment and curiosity residents demonstrate throughout their rotation.

The residency program strengthens the pipeline of future OB/GYN providers while enhancing capacity to serve patients across Central Texas. Residents gain exposure to a diverse patient population, while patients benefit from increased appointment availability and a collaborative model of care.

As the program grows, the ongoing collaboration continues to enhance training opportunities for emerging women’s health providers while expanding access to high-quality care for the community.

Driving Early Detection

LSCC’s Big Pink Bus continued its life-saving mission across Central Texas, bringing high-quality, accessible breast cancer screening directly into underserved communities. The Bus offers advanced 3D mammography, improving early detection, and reducing the need for follow-up imaging. The mobile mammography team once again successfully completed its annual Mammography Quality Standards Act (MQSA) recertification, reaffirming the program’s commitment to federal standards for image quality, safety, and staff expertise.

Throughout the year, the Bus expanded its reach more than ever before. **The team partnered with 51 unique community organizations, the highest number in program history, and traveled over 15,000 miles to provide screenings in 25 cities across Central Texas.** The partnerships included clinics, churches, nonprofits, employers, and civic groups, which created a broad regional network committed

to supporting women’s preventive health. The Big Pink Bus continued to serve individuals facing significant barriers to care. Most patients had household incomes below 200% of the federal poverty level, and the majority identified as Hispanic.

Since launching in 2021, the Bus has delivered more than 9,000 mammograms, supported over 1,600 women through diagnostic navigation, and facilitated 75 treatment referrals for women diagnosed with breast cancer.

These outcomes underscore the critical role of mobile access in addressing screening inequities and improving long-term survival. LSCC’s overall breast cancer screening metric also continued to steadily improve, rising from 44% in 2021 to 52% among eligible patients.

During Breast Cancer Awareness Month, the Big Pink Bus traveled with an Honor Wall to highlight the impact that breast cancer has on the community. The Honor Wall, filled with ribbons purchased in honor or

memory of loved ones, served as a powerful symbol of community solidarity and hope. Outlets including KAZI FM, Spectrum News, and Hill Country News featured the Bus and highlighted its impact.

As 2025 concluded, the Big Pink Bus reaffirmed its role as a critical component of LSCC’s preventive care strategy, demonstrating measurable progress in expanding access to high-quality breast cancer screening across Central Texas. By strengthening community partnerships, maintaining rigorous clinical standards, and improving screening rates among historically underserved populations, the program continued to address significant gaps in early detection. The operational achievements of the year position the Big Pink Bus to further enhance its reach and efficiency in 2026, ensuring LSCC remains a leader in delivering evidence-based mobile mammography services.

Strengthening the pipeline of future OB/GYN providers while enhancing capacity to serve patients across Central Texas.

Connecting Patients to Healthcare Resources

LSCC’s Patient Services team played a critical role in supporting families’ access to supportive programs essential to their well-being.

Through personalized guidance and a strong commitment to reducing barriers to care, the team supported thousands of patients in navigating complex eligibility requirements and enrolling in programs that improve health outcomes and financial stability.

Throughout the year, the team completed 48,192 Program Registration appointments, ensuring patients were appropriately enrolled in LSCC’s sliding-fee levels and able to access affordable, high-quality care.

During the benefits enrollment process, the team assisted patients in applying for a wide range of federal, state, and county health coverage programs, including Marketplace insurance, Medicaid, CHIP, CHIP Perinatal, MAP, Healthy Texas Women, and WilCo.

The team submitted 10,690 individual applications, successfully enrolling 9,671 patients in programs that help reduce the cost of care and expand access to critical services.

Recognizing that health is shaped by more than clinical care, the team also helped patients apply for SNAP food assistance, submitting 1,177 applications.

In addition to one-on-one assistance, Patient Services supported LSCC’s outreach and education efforts throughout the region. **The team participated in 157 community events, meeting patients where they are, and ensuring that families across Central Texas are aware of available resources and how to access them.**

These efforts reflect LSCC’s commitment to addressing financial, social, and administrative barriers that prevent patients from receiving the care they need. By offering hands-on support with enrollment and navigation, the Patient Services team strengthens access to healthcare, enhances community well-being, and helps thousands of Texans receive the services necessary to live healthier lives.

Enhancing Technology Capabilities

In 2025, LSCC advanced a strategic portfolio of artificial intelligence-enabled technologies designed to improve efficiency, reduce administrative burden, and strengthen the patient and staff experience.

LSCC launched Affineon, an AI-driven provider inbox management platform, to streamline lab result handling and medication refill workflows. The pilot, involving 24 providers across several specialties, utilizes automated protocol-based processing and decision-support to reduce provider time spent interpreting lab results and refill requests. Affineon supports clearer patient communication, provides decision-ready summaries, and offers robust customization, including a pregnancy-specific workflow designed for LSCC.

LSCC also fully implemented XpertDox, an AI-powered coding and billing platform that processes about 28,000 claims monthly and submits them to payers within 48 hours. The system refines coding on more than 90% of encounters, improving accuracy and completeness of coding for services provided. A late-2025 ROI analysis projected a net annual revenue increase of roughly \$2.6 million, driven by improved coding precision in encounters reimbursed outside Prospective Payment System methodology.

LSCC began the transition of its intent-based call center self-service functions to Agentic AI. Delivered through Talkdesk Ascend AI platform, this new platform provides a next-generation approach to customer experience by enabling AI agents that can perceive context, make decisions, and execute actions autonomously, handling complex tasks, reducing reliance on human intervention. LSCC expects to roll out these functions in 2026. Additional pilots evaluated AI-based translation technologies to support non-English-speaking patients, with broader rollout planned for 2026.

Systemwide productivity improved with the adoption of Microsoft Copilot Chat, providing secure, integrated AI assistance across Office applications. Staff now use Copilot to streamline meeting preparation, drafting, summarization, and day-to-day administrative tasks.

Together, these technologies mark a significant leap forward in LSCC’s digital transformation, enabling more efficient operations and supporting more accessible and patient-centered care.

Renovating Today for Tomorrow

LSCC made meaningful capital improvements through a series of upgrades and renovations across multiple clinic locations. The enhancements support LSCC’s commitment to advance today to shape tomorrow and align with the Sustainability priority outlined in the 2023–2025 Strategic Plan. By upgrading facilities and assessing opportunities for expansion, LSCC strengthened its capacity to deliver high-quality patient care.

NORTHWEST AUSTIN

Lone Star Circle of Care at Northwest Austin benefited from refreshed interiors. To enhance comfort and patient experience, LSCC updated seating, flooring and added new paint, which made the space more inviting and welcoming across LSCC’s pediatric, behavioral health, and family medicine clinics.

BEN WHITE - BEHAVIORAL HEALTH

In the South Austin region, Lone Star Circle of Care at Ben White - Behavioral Health Clinic also received new flooring and a fresh coat of paint. Returning patients immediately noticed the bright, polished look as soon as they stepped into the updated space.

The enhancements highlight LSCC’s ongoing investment to create modern, welcoming environments that support both patients and care teams.

Guided by Patient Experience

LSCC advanced its patient experience efforts through the collection of patient feedback using the Qualtrics survey platform. Qualtrics is a robust survey platform that captures real-time responses from LSCC patients. The platform offers SMS and translation capabilities and offers more flexibility for LSCC to create custom surveys and manage patient experience data more effectively. LSCC’s Patient Experience Team streamlined surveys by reducing the number of questions and making them easier for patients to complete while still capturing the performance measures necessary to evaluate operational effectiveness. In the first year of using Qualtrics, LSCC experienced a 38.9% increase in survey responses compared to 2024.

LSCC patients can complete surveys across multiple service lines, including medical, dental, telemedicine, and the Big Pink Bus.

LSCC received feedback highlighting multiple positive patient experience stories. One patient highlighted their positive experience with LSCC’s Family Physician, Dr. Tobat.

“Dr. Tobat is amazing. Always listens to me and works with me. Always gives me the correct treatment to the best of her knowledge to help me. I love that we work together and work on a plan on what’s the best treatments for my body and situation.”

Another patient highlighted the compassion of the staff at LSCC’s clinics. “I love the staff they have been seeing me for years as I grew up and I grew my family and now as my children grow up this staff is so compassionate and caring I truly could not imagine having a better healthcare team on my side.”

Dr. Pantoja, an OB/GYN Physician, and her team were also mentioned in a patient survey. “It was my first time visiting Dr. Pantoja and she made me feel like she cared. She was very attentive and immediately ordered all the necessary tests and exams to begin the journey on getting better. Her and her staff were very attentive, caring and informative. I’ve found my forever home.”

Surveying efforts ensure every patient is heard, valued, and supported at every step of their care.

Advocating for Community Health Centers

LSCC’s leadership engaged in advocacy efforts to advance the priorities of patients and communities served by LSCC. Working alongside the Texas Association of Community Health Centers and Advocates for Community Health, LSCC representatives met with state and federal lawmakers and staff to elevate key issues affecting access to care in Central Texas.

Despite a challenging policy environment, LSCC and community health center partners across the state helped secure several meaningful wins. These included **\$40 million in state funding for the Federally Qualified Health Center (FQHC) Incubator Program**, the advancement of new Medicaid benefits such as lactation consultation and nutrition services, and stronger expedited credentialing processes for FQHCs. Health centers were also positioned as essential partners in major statewide initiatives, including rural health transformation and chronic disease prevention.

These collective achievements demonstrate LSCC’s commitment to advocacy that drives real, measurable impact for patients, families, and communities across Texas.

Advancing Care Through Generosity

FUNDRAISING CAMPAIGNS

In alignment with the sustainability pillar of LSCC’s strategic plan, LSCC’s Development team implemented additional fundraising initiatives. Seasonal and theme-based digital fundraising campaigns raised support for LSCC and the Big Pink Bus. Each campaign spotlighted one or more LSCC service lines, shared patient stories to demonstrate the impact of donor support, and encouraged people to give or learn more. Outreach included email newsletters, social media posts, and blog content. Campaigns throughout the year included Amplify Austin in early March, a Behavioral Health Campaign during Mental Health Awareness Month in May, a Breast Cancer Awareness Campaign in October, and an End-of-Year campaign spanning from Giving Tuesday through the end of December.

COMMUNITY ENGAGEMENT FUNDRAISERS

LSCC’s Development team additionally strengthened grassroots and community engagement through supporter-led fundraisers. These initiatives encouraged individuals and groups to host their own events and campaigns to benefit LSCC and the Big Pink Bus. Some of the highest contributing events included a tennis tournament at Westwood Country Club, a month-long profit-share with Texas Roadhouse in Temple, and Marble Falls Fire Rescue’s “Pink Out” event. These community-driven efforts benefited the Big Pink Bus and promoted LSCC’s mission, services, and impact across Central Texas.

2025 Big Pink Benefit

In 2025, LSCC proudly launched its new community fundraiser, the Big Pink Benefit. The inaugural event, held on September 5, offered an afternoon of boutique shopping, refreshments, silent and live auctions, awards, an inspiring program, and tours of the Big Pink Bus. More than 110 attendees participated, over 50 volunteers supported the event, and more than 20 companies sponsored the Benefit. As a ticketed event, all proceeds directly supported the Big Pink Bus and its continuing mission to provide accessible, life-saving breast cancer screenings in Central Texas. **The event raised funds to cover more than 260 mammograms.**

Awards and Achievements

LSCC received several recognitions in 2025. These achievements highlight the dedication of LSCC’s teams and the impact of strong community partnerships that advance the mission forward.

THE JOINT COMMISSION REACCREDITATION

LSCC strives to provide the highest-quality care and continually improve patient outcomes for underserved residents. LSCC once again demonstrated unwavering commitment to delivering safe, high-quality, patient-centered care through a highly successful accreditation survey by The Joint Commission (TJC).

As the nation’s leading healthcare accrediting body, TJC evaluates organizations against the most rigorous standards in the industry. The standards are rooted in evidence-based practice, patient safety, and operational excellence. This year’s accreditation reaffirmed that LSCC continues to stand among top-performing healthcare organizations nationwide.

The survey brought together staff from every role and every department within LSCC. Leadership responded to requests from TJC Surveyors and staff walked side by side with reviewers to conduct tracers of several clinics. Whether participating in the tracer activities, documentation reviews, interviews, facility walkthroughs, or keeping patient services operational, every team member contributed to this success. Surveyors noted repeatedly how deeply the LSCC mission is embedded in daily practice. They spoke of how they could feel the organization’s commitment to serving vulnerable populations from the moment they stepped into the clinics. From the cleanliness and readiness of facilities to the engagement and professionalism of staff, the feedback was overwhelmingly positive.

As LSCC moves forward, the organization remains dedicated to sustaining the standards that earned this accreditation and advancing the quality and safety of services. TJC surveyors left with full confidence that LSCC will continue improving, evolving, and leading with integrity.

CENTRAL TEXAS FOOD BANK 2025 HUNGER HERO

The Central Texas Food Bank recognized LSCC as a 2025 Hunger Hero. LSCC’s Community Health Team received the award for their role in providing nutritious food to the local community through the Mobile FARMacy program. LSCC is grateful for its partnership with the Central Texas Food Bank and proud to be named a Hunger Hero.

2025 GREATER AUSTIN BUSINESS AWARDS NONPROFIT IMPACT AWARD FINALIST

LSCC was recognized as a finalist for the Nonprofit Impact Award at the 2025 Greater Austin Business Awards. The award recognizes nonprofits that demonstrate exceptional service to the community. LSCC was acknowledged for its innovation, evidence-based care, and strong community partnerships that support high-quality, patient-centered services.

AMERICAN HEART ASSOCIATION NATIONAL RECOGNITIONS

LSCC earned two national recognitions from the American Heart Association, including one in partnership with the American Medical Association:

- Gold+ Target: BP Award
- Gold Target: Type 2 Diabetes Award

Over 70% of LSCC’s adult patients with high blood pressure are now managing it effectively. This result was achieved in part through enhanced awareness, early detection, and comprehensive care for patients with type 2 diabetes.

These recognitions reflect the incredible work of LSCC’s dedicated care teams in improving health outcomes.

Partners and Grantors

In 2001, LSCC was founded on the promise of bringing quality, affordable healthcare to all. Caring for our Texas neighbors, regardless of income or insurance status, requires significant resources. Addressing the social constructs that affect health, those that must be treated outside the exam room, do as well. LSCC’s many donors, partners, and collaborators help make LSCC’s mission a reality.
